- Facilitated the transition of first-year bachelor students into the BSc Economics program - Provided guidance on curriculum structure and academic expectations - Supported students in adapting to university life in Tilburg	

RESEARCH EXPERIENCE

Impact of Air Pollution on Birth Outcomes: Causal Evidence from India (with Shobhit Kulshreshtha) – <i>Revise & Resubmit, Journal of Environmental Economics and Management</i>
Applied causal inference techniques to large-scale DHS data to quantify the impact of prenatal air pollution on neonatal health, linking findings to key economic costs and policy implications
How Do I Rank Myself? Perceived Economic Positions and Personality Traits (with Marike Knoef, Jorgo Goossens and Eduard Ponds)
Combined survey and administrative data to examine misperceptions of economic rank, linking personality traits to systematic biases with potential implications for economic decision-making
